Summary

Hey, I'm a Brazilian who started coding with 15 and got his first job at 19 years old, in 2015.

I started my full-time career at a software factory, which I believe is one of the richest places you can start on, in terms of knowledge.

After 2 years, dozens of projects and a hand-full of clients I choose to move to Europe. Now I live and work in Norway.

Experience

5 years as full-time and 1 year as intern.

Software Engineer (Senior)

Sportradar

📅 03/2018 - Ongoing 📍 Trondheim, Norway

Sportradar is the world's leading sports data company, have clients like NHL, NBA, FIFA and NASCAR.

- Works with TypeScript and applied on real-time apps, scheduling apps and direct revenue apps;
- Created a few micro-frontends and the platform where they run;
- Was set as security champion of 2 teams and achieved great results in reducing vulnerabilities;
- Helps hiring, onboarding and solving technical doubts from new employees;
- Talks directly with product team to provide solutions;
- Interact with all development process, including setup and deploy of projects;

Software Engineer (Contractor)

Syntesis

📅 01/2018 - 03/2018 📍 Santa Maria, Brazil

Syntesis created SYNSUITE, an software capable to manage businesses in almost every aspect.

- Worked on the migration and installation of their own hosted Gitlab instance;
- Implanted a new development workflow that enabled them to build faster;
- Ported their system to work within docker containers;
- Created deployment pipelines allowing them to do seamless atomic deployments;

Software Engineer (Mid-level)

Meta

📅 03/2016 - 01/2018 📍 Recanto Maestro, Brazil

Meta is an international IT outsourcing enterprise operating a software factory that is listed as one of the leaders in Brazil.

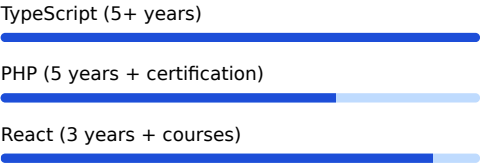

- Was set as technical reference for PHP outsourcing projects;
- Took responsibility at client's operation critical situations;
- Was making deployment of features with business impact;
- Were involved in meetings with clients and sometimes travelled to meet them;
- Worked in multiple projects and clients at same time, seamlessly doing context switch;
- Got experience with big clients under the national market, such as Unimed;

Education

- Information Systems BSc
- Certified PHP Engineer by ZEND
- Advanced Patterns - React Live AMS

Expertise

How comfortable I'm with each technology

Volunteer

Case study for university students

Participated in presentations for more than 500 concurrent students where I was interviewed and used as a case study.

Judge in hackaton

CODE RACE is the biggest hackaton in the shouthest state in Brazil. In one of their editions I had the opportunity to be a judge.

Software development teacher

Teached how to code web apps to young students in small cities as part of a social program to give them more opportunities in life.
