Summary

Hey! I'm a Brazilian who is pasionate about building high-impact, well-performing user experiences.

I believe that work is a big portion of my day, so I try to make the best out of it for me and my colleagues.

On being a senior engineer is an article from Kitchen Soap that I like and use as guidance.

Experience

5 years as full-time and 1 year as intern.

Sportradar - Software Engineer (Senior)

📅 03/2018 - Ongoing · 3 yrs 7 mos   ◎ Trondheim, Norway

Sportradar is the world's leading sports data company, have clients like NHL, NBA, FIFA and NASCAR.

- Improved DX for micro-frontend teams. For example, the build times were reduced by an avg. of 70%;
- Reduced by 87% the number of software vulnerabilities over two teams, either by triage or by development advising;
- Resolves performance issues on applications with high level of data updates or high amount of data;
- Support hiring, onboarding and mentoring new employees;

Meta - Software Engineer (Mid-level)

📅 03/2016 - 01/2018 · 1 yrs 10 mos   ◎ Recanto Maestro, Brazil

Meta is an international IT outsourcing enterprise, have clients like Sascar, Unimed and O Boticário.

- Responsible for deployments of applications that could have a severe business impact if there was a downtime;
- Worked with different development methodologies, as clients may use different variations of Scrum or other methods;
- Helped on architecting and kick-starting projects. Was set as technical reference for PHP outsourcing;
- Represented the company in conversations with clients, helping them to solve problems and taking decisions over technical aspects;

There is three working experiences that are not listed.

What sets me apart?

- I demonstrate strong performance so **colleagues can rely upon me**.
